Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 28 September 2001.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 8 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 8 recites the limitation "the same modality" in line 11. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-8 are rejected under 35 U.S.C. 102(e) as being anticipated by Kunieda et al. US 6,307,914. Kunieda et al. discloses (abstract) a method and apparatus for controlling a radiation therapy beam and patient positioning during treatment comprising positioning a target located in a patient to be subjected to radiation therapy and imaging the target using a plurality of imaging devices (Fig. 1); relating the position of the target positioning means, the target imaging means

and the irradiation means in 3 dimensions (columns 3-4); irradiating the target according to prescribed conditions; continuously correcting the irradiating conditions to compensate for patient movement as it occurs by using a control system for continuously monitoring the positions of the target in 3 dimensional images taken during treatment with images taken for therapy planning, and then altering the position of the target and the irradiating conditions to maintain the prescribed therapy (Fig. 10).

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Nishihara US 6,219,403 teaches a method and system for correcting radiation therapy parameters and patient position during therapy to compensate for patient movement by comparing images taken in real time during therapy of a fluoroscopic marker placed near the target to be irradiated with images of the target region taken by CT scanner beforehand during therapy planning.

Yanoff et al. US 6,052,611 teaches a stereotactic system for tracking a target in real time comprising positioning in scanner space, image space (in which patient positioning is measured) and localizer space in which a therapeutic device is moved to a target, compensating for patient movement.
